

INSTRUCTION MANUAL FOR

EXTENSION KIT

MODEL NO.: BD40 Extension Kit

Instruction manual - English

page 2 - 3

Congratulations on upgrading your brewing setup with the Brewster Dominator Extension Kit.

You're about to unlock a new level of brewing potential that allows you to double your batch size and double the fun. Get ready for Happy Hour like never before, with more flexibility and twice the fun!

The kit adds 25 liters to your existing brew kettle, increasing the total brew volume to a generous 65 liters.

Please follow the instructions in this manual to get the best results and user experience with your Extension Kit

Cheers to Brewing Bigger and Better Craft Brewing

7	Sight glass top washer (larger size)		2	8	Instruction manual		1

Assembly Instructions

- Carefully wrap the silicone seal around the edge of the Brewster Dominator where the extension piece will sit. Ensure the seal is evenly positioned to prevent any gaps or leaks during brewing.

- Position the boiler extension on top of the Brewster Dominator. Ensure that the middle line on both the Brewster Dominator and the boiler extension align perfectly.
- Once aligned, lock the buckles securely in place to hold the boiler extension firmly to the base. Double-check that the connection is tight to avoid any leaks during brewing.

- Carefully insert the recirculation pipe extension into the Cam Lock. Press down the two handles on the Cam Lock to lock it into place.

- Unscrew the barb connector on the existing sight glass. Place the larger washer on top of the bottom sight glass and screw the sight glass extension into place. Make sure a smaller washer is correctly positioned between the stainless-steel shield and the sight glass to prevent any leaks. Once everything is aligned, tighten the sight glass securely

- Place the larger washer on top of the sight glass extension, ensuring it's correctly positioned. Then, screw the barb connector onto the sight glass extension securely, making sure everything is fastened to prevent any leaks during use.

- Place the lower mesh disc into the grain basket, then carefully insert the grain basket into the brew kettle using the handle. Then, lock the sparge arm in place to complete the setup.
- Your Brewster Dominator is now ready for larger brew batches with the extension kit properly installed.
